 - The weight of each stock in the index is proportional to its market cap and its sector weight.

REBALANCING

- Quarterly rebalance on the third Friday of March, June, September, and December.

Investing involves risk including possible loss of principal. The Funds' consideration of the Guidelines in its investment process may result in choices not to purchase, or sell, otherwise profitable investments in companies that have been identified as being in conflict with the Guidelines. This means that the Fund may underperform other similar funds that do not consider the Guidelines when making investment decisions.
