CHIC

Global X MSCI China Communication Services ETF

KEY FEATURES

Targeted Exposure
CHIC is a targeted play on the Communication Services Sector in China - the world’s second largest economy by GDP.

ETF Efficiency
In a single trade, CHIC delivers access to dozens of communication services companies within the MSCI China Index, providing investors an efficient vehicle to express a sector view on China.

All Share Exposure
The Index incorporates all eligible securities as per MSCI’s Global Investable Market Index Methodology, including China A, B and H shares, Red chips, P chips and foreign listings, among others.

Beyond Ordinary ETFs®
### MSCI China Communication Services 10/50 Index

The MSCI China Communication Services 10/50 Index is designed to capture the large- and mid-capitalization segments of securities included in the MSCI China Index that are classified in the Communication Services Sector as per the Global Industry Classification Standard (GICS®). The Index incorporates all eligible securities as per MSCI’s Global Investable Market Index Methodology, including China A, B and H shares, Red chips, P chips and foreign listings (e.g., American Depositary Receipts). Additionally, the Index utilizes a 10/50 concentration constraint whereby the weight of each group entity in the Index is capped at 10% and the cumulative weight of all group entities with a weight in excess of 5% does not exceed 50% of the Index by weight.

### MSCI ACWI Index

MSCI ACWI Index captures large and mid cap representation across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries. The index covers approximately 85% of the global investable equity opportunity set. DM countries include: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the UK and the US. EM countries include: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Pakistan, Peru, Philippines, Poland, Russia, Qatar, South Africa, Taiwan, Thailand, Turkey and United Arab Emirates.

### Definitions

**MSCI China Communication Services 10/50 Index**

### Annualized Volatility

The annualized standard deviation of the daily returns of the security using the closing levels of the index during the 22 index-day period preceding that day.

### Beta

Measures the volatility of the Fund price relative to the volatility in the market index and can also be defined as the percent change in the price of the Fund given a 1% change in the market index. A beta below one suggests that the Fund was less volatile than the market benchmark.

### Sharpe Ratio

Measures the return for each unit of risk. The risk free rate is subtracted from the mean return and is divided by the standard deviation of returns.

---

(1) The Fund’s name, investment objective, and investment strategy changed effective December 06, 2018. The Fund inception date reflects the original inception date of the Fund when it was the Global X NASDAQ China Technology ETF.

(2) The Hybrid China Technology Index reflects the performance of the Selective China Technology Index through December 13, 2011, the NASDAQ DMX China Technology Index through December 04, 2018 and the MSCI China Communication Services 10/50 Index going forward.

Investing involves risk, including the possible loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Investments in securities in the Technology sector are subject to rapid changes in technology product cycles; rapid product obsolescence; government regulation; and increased competition, both domestically and internationally, including competition from foreign competitors with lower production costs. Technology companies and companies that rely heavily on technology tend to be more volatile than the overall market, and are also heavily dependent on patent and intellectual property rights. Securities focusing on a single country and narrowly focused investments may be subject to higher volatility. CHIC is non-diversified. The information provided is not intended for trading purposes, and should not be considered investment advice.

Carefully consider the Fund’s investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in the Fund’s full or summary prospectus, which may be obtained by calling 1.888.493.8631, or by visiting globalxetfs.com. Please read the prospectus carefully before investing.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Beginning October 15, 2020, market price returns are based on the official closing price of an ETF share or, if the official closing price isn’t available, the midpoint between the national best bid and Ask price. NAVs are calculated using prices as of 4:00 PM Eastern Time. The returns shown do not represent the returns you would receive if you traded shares at other times. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
