CTEC

Global X CleanTech ETF

REASONS TO CONSIDER

High Growth Potential
By 2050, cumulative investment across clean technologies is projected to reach $94-$131tn, depending on the decarbonization scenario. (1)

Unconstrained Approach
CleanTech is a dynamic theme, supporting a long-term structural shift in worldwide energy use. CTEC invests accordingly, with global exposure across multiple sectors and industries.

Conscious Approach
CTEC incorporates the Environmental, Social & Governance (ESG) proxy voting guidelines from Glass Lewis.

The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor’s shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. High short-term performance, when observed, is unusual and investors should not expect such performance to be repeated. Returns for periods greater than one year are annualized. Click here for standard performance as of the most recent quarter-end.

SECTOR BREAKDOWN (%)

- Information Technology 46.05%
- Industrials 44.52%
- Consumer Discretionary 4.98%

DEFINITIONS

Indxx Global CleanTech Index

The Underlying Index is designed to provide exposure to exchange-listed companies that are positioned to benefit from the increased adoption of technologies focused on improving the efficiency of renewable energy production and/or mitigating the adverse environmental effects of resource consumption ("CleanTech"), including, but not limited to, companies whose principal business is in developing technology relating to renewable energy, energy efficiency and storage, smart grid, lithium-ion batteries and/or fuel cells, and/or pollution prevention/amelioration (collectively, "CleanTech Companies"), as defined by Indxx LLC, the provider of the Underlying Index ("Index Provider").

Investing involves risk, including the possible loss of principal. The investable universe of companies in which CTEC may invest may be limited. CleanTech Companies typically face intense competition, short product lifecycles and potentially rapid product obsolescence. These companies may be significantly affected by fluctuations in energy prices and in the supply and demand of renewable energy, tax incentives, subsidies and other governmental regulations and policies. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from social, economic or political instability in other nations. CTEC is non-diversified. The information provided is not intended for trading purposes, and should not be considered investment advice.

Carefully consider the Fund’s investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in the Fund’s full or summary prospectus, which may be obtained by calling 1.888.493.8631, or by visiting globalxetfs.com. Please read the prospectus carefully before investing.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. The market price returns are based on the official closing price of an ETF share or, if the official closing price isn’t available, the midpoint between the national best bid and national best offer (“NBBO”) as of the time the ETF calculates current NAV per share, and do not represent the returns you would receive if you traded shares at other times. NAVs are calculated using prices as of 4:00 PM Eastern Time. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.

Since the Fund’s shares did not trade in the secondary market until several days after the Fund’s inception, for the period from inception to the first day of secondary market trading in shares, the NAV of the Fund is used to calculate market returns.
