Global X DAX Germany ETF

REASONS TO CONSIDER

Growth Potential
Rebounding from the pandemic, Germany’s GDP grew at a rate exceeding 1.5% in 2022. While forecasts suggest a slight downturn of 0.29% in 2023, it is expected to continue annual rates of more than 1.5% growth in 2024-2026. (1)

Targeted Exposure
The ETF provides targeted exposure to Germany, the largest economy in Europe by GDP.

Efficient Access
DAX delivers efficient access to 40 of the largest and most liquid publicly traded companies in Germany, spanning a range of economic sectors.

The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor’s shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. High short-term performance, when observed, is unusual and investors should not expect such performance to be repeated. Returns for periods greater than one year are annualized. Click here for standard performance as of the most recent quarter-end.

Investing involves risk, including the possible loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Securities focusing on a single country may be subject to higher volatility. DAX is non-diversified. The information provided is not intended for trading purposes, and should not be considered investment advice.

Carefully consider the Fund’s investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in the Fund’s full or summary prospectus, which may be obtained by calling 1.888.493.8631, or by visiting globalxetfs.com. Please read the prospectus carefully before investing.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Beginning October 15, 2020, market price returns are based on the official closing price of an ETF share or, if the official closing price isn’t available, the midpoint between the national best bid and national best offer (“NBBO”) as of the time the ETF calculates current NAV per share. Prior to October 15, 2020, market price returns were based on the midpoint between the Bid and Ask price. NAVs are calculated using prices as of 4:00 PM Eastern Time. The returns shown do not represent the returns you would receive if you traded shares at other times. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
