

FUND OBJECTIVE

The Global X E-commerce ETF seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of the Solactive E-commerce Index.

For informational purposes only. This document should be used to highlight some of the criteria to be used by index provider when publishing index constituents and is not comprehensive.*

ETF Category:
Growth - People & Demographics

As of 3/1/20

Index Provider: SOLACTIVE

KEY FEATURES

High Growth Potential

Unconstrained Approach

ETF Efficiency

SOLACTIVE E-COMMERCE INDEX

SELECTION POOL

- Minimum market cap of \$200M
- Primary listing in Developed Markets (as defined by Solactive) countries, Brazil, Turkey, Taiwan, and South Korea. ADRs of companies listed in Emerging Markets (as defined by Solactive) countries are also eligible for inclusion.
- Average daily trading volume of at least \$2 million over the last 6 months

RANKING

- The Solactive E-commerce Index tracks the performance of companies that are (or are expected to be in the near future) active in the field of e-commerce
- Solactive has identified the following three business activities as essential to the underlying theme:
 - Companies that operate e-commerce platforms that connect buyers and sellers of goods and services via online marketplaces
 - Companies that provide e-commerce software, analytics, or services that facilitate the development and enhancement of e-commerce platforms
 - Companies that primarily sell goods and services online and generate the majority of their overall revenue from online retail
- Company selection is initially conducted based on screening of publicly available information such as financial websites, search engines, or company publications using a natural language processing algorithm. Using keywords that describe the underlying theme, the algorithm identifies companies that have or are expected to have significant exposure to the field of e-commerce
- From the list of companies produced by the natural language processing algorithm, only companies that generate at least 50% of their revenues (as determined by Solactive) from the e-commerce activities described above are eligible for inclusion in the index
- The index includes a maximum of 40 constituents, and a minimum of 30 constituents

WEIGHTING AT SELECTION/CAPPING METHODOLOGY

- The index is modified market cap weighted
 - A single company limit of 4% and weight floor of 0.3% are applied

REBALANCES

- The index reconstitution process described above is conducted semi-annually on the last business day of January and the last business day of July

For more information on the Index, please visit Solactive's website.

*For the complete and current index methodology please refer to the index provider's website. This summary document is accurate as of the time of its publication and Global X does not guarantee that it is current at any point thereafter.

The selection of the index constituents and their weighting is made by the index provider at its sole discretion.

Carefully consider the fund's investment objectives, risks, and charges and expenses. This and other information can be found in the fund's full or summary prospectus, which may be obtained by visiting globalxetfs.com. Please read the prospectus carefully before investing.

Investing involves risk, including the possible loss of principal. The investable universe of companies in which EBIZ may invest may be limited. The companies in which the Fund invests may be subject to rapid changes in technology, intense competition, rapid obsolescence of products and services, loss of intellectual property protections, evolving industry standards and frequent new product productions, and changes in business cycles and government regulation.

International investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles, or from social, economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors, as well as increased volatility and lower trading volume. EBIZ is non-diversified.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
