The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor’s shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. High short-term performance, when observed, is unusual and investors should not expect such performance to be repeated. Returns for periods greater than one year are annualized. Click here for standard performance as of the most recent quarter-end.

COUNTRY BREAKDOWN (%)

- Britain 17.82%
- Japan 14.59%
- France 10.27%

### DEFINITIONS

<table>
<thead>
<tr>
<th>MSCI EAFE Top 50 Dividend Index</th>
<th>The MSCI EAFE Top 50 Dividend Index invests in 50 of the highest yielding equity securities from international developed markets across Europe, Australasia, and the Far East.</th>
</tr>
</thead>
<tbody>
<tr>
<td>12-Month Trailing Yield</td>
<td>The distribution yield an investor would have received if they had held the Fund over the last twelve months, assuming the most recent NAV. The 12-Month Trailing Yield is calculated by summing any income, capital gains and return of capital distributions over the past twelve months and dividing by the sum of the most recent NAV and any capital gain distributions made over the same period.</td>
</tr>
