SOLACTIVE GLOBAL HYDROGEN INDEX

SELECTION

- The index is designed to track the performance of companies that have or are expected to have business operations in the production or use of hydrogen as a fuel source.
- Companies may be involved in the following "Hydrogen Activities":
 - Hydrogen Production
 - Hydrogen Fuel Cells
 - Hydrogen Technology
 - Hydrogen Integration
- Each company is classified as follows according to the extent to which it generates revenues from Hydrogen Activities:
 - Pure-Play: Derives at least 50% of revenue from Hydrogen Activities.
 - Pre-Revenue: Has primary business operations in Hydrogen Activities but does not currently generate revenue.
 - Diversified: Derives less than 50% revenue from Hydrogen Activities.
- If there are fewer than 25 Index Components after all Pure-Plays have been included, Pre-Revenue companies are included until the index reaches 25 Index Components. If there are fewer than 25 Index Components after all Pre-Revenue companies have been included, Diversified companies are included until the index reaches 25 components.
- The maximum number of constituents is 40.

SELECTION POOL

- Eligible companies must have:
 - Share Class Market Capitalization of \$100 million if they are not current constituents and \$80 million if they are current constituents.
 - Average Daily Value Traded of at least \$2 million over the last six months and \$1.4 million for existing constituents.
 - Primary listing in a Developed Market or Emerging Market (excluding India).
 - Traded on 90% of the eligible trading days for the previous 6 months.
 - Free Float percentage of total shares outstanding of at least 10% or a minimum Free Float Market Capitalization of \$1 billion.

WEIGHTING SCHEME

- Index components are weighted according to their Free Float Market Capitalization:
 - Each component is subject to maximum weight of 12% and a minimum weight of 0.3%.
 - The aggregate weight of companies weighted above 4.5% cannot exceed 45% of the index weight. The remaining companies are capped at 4.5%.
 - The aggregate weight of Pre-Revenue and Diversified companies cannot exceed 10% of the index weight, and the maximum weight of the individual aforementioned companies is 2%.

REBALANCING

- The index follows a semi-annual rebalancing schedule, made on the second Friday of May and November each year, at the close of business.
- The index follows a semi-annual review -- if the aggregate index weight of Diversified and Pre-Revenue index components exceeds 20%, then the index is reweighted to cap it at 18% on the second Friday of February and August.

For more information on the Index, please visit Solactive's website.

*For the complete and current index methodology please refer to the index provider's website. This summary document is accurate as of the time of its publication and Global X does not guarantee that it is current at any point thereafter.

The selection of the index constituents and their weighting is made by the index provider at its sole discretion.

Carefully consider the fund's investment objectives, risks, and charges and expenses. This and other information can be found in the fund's full or summary prospectus, which may be obtained by visiting globalxetfs.com. Please read the prospectus carefully before investing.

Investing involves risk, including the possible loss of principal. Hydrogen companies typically face intense competition, short product lifecycles and potentially rapid product obsolescence. They may be significantly affected by fluctuations in energy prices and in the supply and demand of renewable energy, tax incentives, subsidies and other governmental regulations and policies. Investments in smaller companies typically exhibit higher volatility. HYDR is non-diversified.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
