#### DURATION BY FIXED INCOME ASSET CLASS<sup>4</sup> (Years)

#### FIXED INCOME YIELDS (YIELD TO WORST) - 5 YEAR AVERAGE 4

Source: Bloomberg as of 12/31/2023

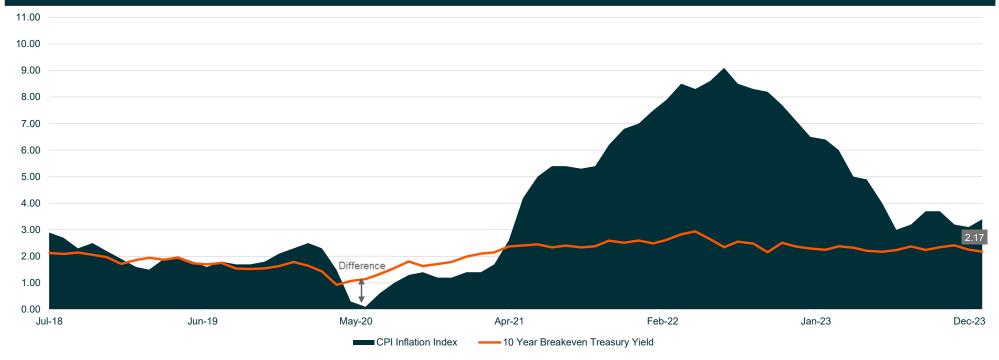

(4) Asset class representations are as follows, Convertible Bonds, Bloomberg US Convertible Bond Index; Variable Rate Preferreds, ICE US Variable Rate Preferred Securities Index; MBS, Bloomberg US MBS Index; High Yield Bonds, Bloomberg US Corporate High Yield Total Return Index; Broad Preferreds, ICE BofA Diversified Core US Preferred Securities Index; Municipal Bonds; Bloomberg Municipal Bond Index; Investment Grade Bonds, Bloomberg U.S. Aggregate Bond Index; Emerging Market (EM) Bonds, Bloomberg EM USD Aggregate Total Return Index; TIPS, Bloomberg US Treasury Inflation Notes TR Index; Corporate Bonds, Bloomberg US Corporate Total Return Index.

#### US 10-YEAR BREAKEVEN TO CONSUMER PRICE INDEX (%)

Source: Bloomberg as of 12/31/2023

BREAKEVEN TREASURY YIELDS, INDICATING MARKET INFLATION EXPECTATIONS, ARE DERIVED FROM THE DIFFERENCE BETWEEN NOMINAL BOND YIELDS AND INFLATION-PROTECTED BOND YIELDS OF THE SAME MATURITY. CONSUMER PRICE INDEX (CPI) FIGURES HAVE DECLINED SINCE THEIR PEAK IN MAY 2022, CAUSING A CORRESPONDING DROP IN 10-YEAR BREAKEVEN RATES.

12/31/2023

#### SWAP SPREAD TO TREASURY YIELDS

#### Source: Bloomberg as of 12/31/2023

SWAP SPREADS ARE THE DIFFERENCE BETWEEN THE FIXED-RATE PAYMENT ON A SWAP AND THE YIELD ON GOVERNMENT BONDS OF THE SAME MATURITY. WHILE SHORT TERM YIELDS REMAIN ELEVATED, LONG AND MID DURATION YIELDS FELL MODESTLY NEAR YEAR END, THEREBY KEEPING THE YIELD CURVE INVERTED.

#### CENTRAL BANKS POLICY RATES AND FUTURE PROJECTIONS

#### CREDIT SPREAD TO 10-YEAR TREASURY YIELD 5

Source: Bloomberg as of 12/31/2023

7%

YIELDS ON INVESTMENT GRADE AND HIGH YIELD BONDS FOLLOWED TREASURIES, FALLING INTO THE END OF THE YEAR. MEANWHILE, THE SPREAD TO 10-YEAR TREASURIES NARROWED FROM MAY OF 2023 THROUGH YEAR END, SUGGESTING A DECLINE IN PERCEIVED SOLVENCY RISKS AND INCREASED RISK APPETITE.<sup>6</sup>

5) Asset class representations are as follows, High Yield Bonds, Bloomberg US Corporate High Yield Total Return Index; Investment Grade Bonds, Bloomberg US Corporate Total Return Index; 10 Year Treasuries, United States Government Bond 10Y. Investment Grade and High Yield represented by Yield to Worst metric.

6) Long-term yields are assessed using the 10-Year Treasury Yield, and the data is sourced from Bloomberg. Treasury Yields are tracked through the US Treasury Yield Curve Rate T Note Constant Maturity 10 Year Index.

## Definitions

For more information on high income strategies, please visit: www.globalxetfs.com/income-etfs

S&P MLP Index provides investors with exposure to the leading partnerships that trade on the NYSE and NASDAQ. The index includes both master limited partnerships (MLPs) and publicly traded limited liability companies (LLCs), which have a similar legal structure to MLPs and share the same tax benefits.

Bloomberg US Corporate High Yield Total Return Index measures the USD-denominated, high yield, fixed-rate corporate bond market. Securities are classified as high yield if the middle rating of Moody's, Fitch and S&P is Ba1/BB+/BB+ or below. Bonds from issuers with an emerging markets country of risk, based on the indices' EM country definition, are excluded.

Bloomberg EM USD Aggregate Total Return Index is a flagship hard currency Emerging Markets debt benchmark that includes fixed and floating-rate USD dollar-denominated debt issued from sovereign, quasisovereign, and corporate EM issuers.

FTSE NAREIT AIL Equity REITS Index is a free float adjusted market capitalization weighted index that includes all tax qualified equity REITS listed in the NYSE, AMEX, and NASDAQ National Market.

The Bloomberg US Corporate Total Return Index measures the investment grade, fixed-rate, taxable corporate bond market. It includes USD denominated securities publicly issued by US and non-US industrial, utility and financial issuers.

MSCI USA High Dividend Yield Index is based on the MSCI USA Index, its parent index, and includes large and mid cap stocks. The index is designed to reflect the performance of equities in the parent index (excluding REITs) with higher dividend income and quality characteristics than average dividend yields that are both sustainable and persistent. The index also applies quality screens and reviews 12-month past performance to omit stocks with potentially deteriorating fundamentals that could force them to cut or reduce dividends.

Dow Jones Industrial Average tracks the performance of 30 prominent companies listed on stock exchanges in the U.S.

S&P 500 Index tracks the performance of 500 leading U.S. stocks and captures approximately 80% coverage of available U.S. market capitalization. It is widely regarded as the best single gauge of large-cap U.S. equities.

ICE BofA Fixed Rate Preferred Securities Index tracks the performance of fixed-rate U.S. dollar-denominated preferred securities issued in the U.S. domestic market.

MSCI ACWI Index captures large and mid cap representation across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries. The index covers approximately 85% of the global investable equity opportunity set. DM countries include: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the UK and the US. EM countries include: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Pakistan, Peru, Philippines, Poland, Russia, Qatar, South Africa, Taiwan, Thailand, Turkey and United Arab Emirates.

The Bloomberg US Treasury: 7-10 Year Index measures US dollar-denominated, fixed-rate, nominal debt issued by the US Treasury with 7-9.9999 years to maturity.

At-The-Money (ATM) is when an option's strike price is equal to the current market price of the underlying security.

## **Definitions Continued**

Correlation is a measure that shows how two securities move in relation to each other. A correlation of 1 implies that the securities will exhibit the same price movements. A correlation of 0 means the securities demonstrate completely unrelated price movements.

Dividend Yield is a financial ratio that measures the cash dividends paid out to shareholders relative to the market value per share.

Dividend Growth rate is the annualized percentage rate of growth that a particular stock's dividend undergoes over a period of time.

Return on Equity is the amount of net income returned as a percentage of shareholders equity. It measures a corporation's profitability by revealing how much profit a company generates with the money shareholders have invested.

Price to Earnings is a ratio for valuing a company that measures its current share price relative to its per-share earnings

Price to Book is a ratio used to compare a stock's market value to its book value. It is calculated by dividing the current closing price of the stock by the latest quarter's book value per share.

Price to Sales is a valuation ratio that compares a company's stock price to its revenues.

Dividend Coverage is the ratio of company's earnings (net income) over the dividend paid to shareholders, calculated as net profit or loss attributable to ordinary shareholders by total ordinary dividend.

Earnings Growth is the percentage change in a firm's earnings per share (EPS) in a period, as compared with the same period from the previous year

Leverage (Debt to EBITDA) ratio is a measurement of leverage, calculated as a company's interest-bearing liabilities minus cash or cash equivalents, divided by its EBITDA. EBITDA is the earnings before interest, taxes, depreciation, and amortization.

EV/EBITDA ratio is a ratio used to determine the fair market value of a company and divides the EBITDA by the enterprise value. Enterprise value measures the total value of a company including equity and debt while subtracting cash.

US Composite AAA BVAL yield rates for US senior unsecured bonds denominated in USD with Bloomberg composite rating AAA that have BVAL prices at the market close.

US Composite AA BVAL yield rates for US senior unsecured bonds denominated in USD with Bloomberg composite rating AA that have BVAL prices at the market close.

US Composite A BVAL yield rates for US senior unsecured bonds denominated in USD with Bloomberg composite rating A that have BVAL prices at the market close.

US Composite BBB BVAL yield rates for US senior unsecured bonds denominated in USD with Bloomberg composite rating BBB that have BVAL prices at the market close.

US Composite BB BVAL yield rates for US senior unsecured bonds denominated in USD with Bloomberg composite rating BB that have BVAL prices at the market close.

## **Important Information**

Carefully consider the fund's investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in the fund's full or summary prospectus, which may be obtained by calling (1.888.493.8631), or by visiting globalxetfs.com. Read the prospectus carefully before investing.

Investing involves risk, including possible loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Investments in securities of MLPs involve risk that differ from investments in common stock including risks related to limited control and limited rights to vote on matters affecting the MLP. MLP common units and other equity securities can be affected by macro-economic and other factors affecting the stock market in general, expectations of interest rates, investor sentiment towards MLPs or the energy sector, changes in a particular issuer's financial condition, or unfavorable or unanticipated poor performance of a particular issuer (in the case of MLPs, generally measured in terms of distributable cash flow). Investments in the energy industry, entail significant risk and volatility.

High yielding stocks are often speculative, high-risk investments. These companies can be paying out more than they can support and may reduce their dividends or stop paying dividends at any time, which could have a material adverse effect on the stock price of these companies.

The Covered Call suite engages in options trading. An option is a contract sold by one party to another that gives the buyer the right, but not the obligation, to buy (call) or sell (put) a stock at an agreed upon price within a certain period or on a specific date. A covered call option involves holding a long position in a particular asset, in this case U.S. common equities, and writing a call option on that same asset with the goal of realizing additional income from the option premium. By selling covered call options, the funds limit their opportunity to profit from an increase in the price of the underlying index above the exercise price, but continue to bear the risk of a decline in the index. A liquid market may not exist for options held by the funds. While the funds receive premiums for writing the call options, the price they realize from the exercise of an option could be substantially below the indices current market price.

Bonds and bond funds will decrease in value as interest rates rise. High yield bonds involve greater risks of default or downgrade and are more volatile than investment grade securities, due to the speculative nature of their investments. In addition to the normal risks associated with investing, real estate and REIT investments are subject to changes in economic conditions, credit risk and interest rate fluctuations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Preferred stock is subject to many of the risks associated with debt securities, including interest rate risk. In addition, preferred stock may not pay a dividend, an issuer may suspend payment of dividends on preferred stock at any time, and in certain situations an issuer may call or redeem its preferred stock or convert it to common stock.

Variable and Floating Rate Securities may have limits on the maximum increases in coupon rates and may lag behind changes in market rates. A downward adjustment in coupon rates may decrease the Fund's income as a result of its investment in variable or floating rate securities. Performance of companies in the Financials sector may be adversely impacted by many factors, including, among others, government regulations, economic conditions, credit rating downgrades, changes in interest rates, and decreased liquidity in credit markets.

EMBD is actively managed, which could increase its transaction costs (thereby lowering its performance) and could increase the amount of taxes you owe by generating short-term gains, which may be taxed at a higher rate.

U.S. Treasury securities are considered to be of high credit quality and are backed by the full faith and credit of the U.S. government. U.S. Treasury securities, if held to maturity, guarantee a return of principal while no other securities mentioned in this material offer such a guarantee.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. The information provided is not intended for trading purposes, and should not be considered investment advice.

Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index. Past performance is not a guarantee of future results.

Global X Management Company, LLC serves as an advisor to the Global X Funds. The Funds are distributed by SEI Investments Distribution Co. (SIDCO, 1 Freedom Valley Drive, Oaks, PA, 19456), which is not affiliated with Global X Management Company, LLC.
