Summary

After a strong performance in Q4 2020, international equities saw mixed results in Q1 2021. A strong economic recovery in China and a speedy vaccination campaign in the US have both created tailwinds for growth around the world. But despite these positive developments, vaccination campaigns around the world are moving at different paces with a surge of COVID cases seen stretching into early Q2. Mixed returns in Q1 2021 are yet another sign that the global economy is not yet out of the woods.

The US-based S&P 500 outperformed broad international equity markets in Q1, returning 6.17% versus 4.57% for the MSCI All Country World Index (ACWI). Emerging markets fared worse with only 2.29% growth, which seems to reflect the slower vaccination rollout within the developing world. Nine of Global X's single country and regional funds underperformed the ACWI, while three outperformed it.

Country/Region (ETF Ticker)	1 month return (%)	3 month return (%)	1 mo. Return (%)		3 mo. Return (%)	
			15	10	5	0

The investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost and current performance may be lower or higher than the performance quoted. Returns for periods greater than one year are annualized. For performance data current to the most recent month end, please click on the fund links above.

Notable Performers

The top performing single country fund for the quarter was the Global X MSCI Norway ETF (NORW) with 9.29% returns, led by strong performance in the Materials, Energy, and Financial sectors. The Global X DAX Germany ETF (DAX) was the second-best performer with gains of

4.96%. DAX managed to deliver decent returns despite reintroduced lockdowns and vaccination delays around the Eurozone.

Despite disappointing returns in the first month of Q1, Pakistan recovered later in the quarter and offered positive returns for Q1, with the Global X MSCI Pakistan ETF (PAK) returning 4.64%. Powered by a trend of recovery in key supporting economies, remittances from overseas Pakistanis in the month of March grew 43% year-on-year, providing a boost for consumption.¹

Laggards

The worst performer of Q1 2021 was the Global X MSCI Colombia ETF (GXG), which underperformed the ACWI with -11.03% returns. This is in stark contrast to Q4 2020, during which GXG returned 38.90% amid rising oil prices. Part of Colombia's steep ascent in Q4 can be attributed to its lifting of a five-month lockdown in September. Q1 saw the return of lockdowns in major cities like Bogota that pulled back the post-lockdown momentum of Q4.

Also in Latin America, the Global X MSCI Argentina ETF (ARGT) recorded a -5.15% decline. An unexpected uptick in inflation, which moved up 4.8% in March, created consternation over Argentina's recovery prospects.² Troubles with economic recovery come ahead of crucial legislative elections in Q4 2021.

Nigeria was the second worst performer for Q1, with returns on the Global X MSCI Nigeria ETF (NGE) dipping to -7.90%. Nigeria's economic recovery in Q1 was dampened by burgeoning food inflation and a worsening unemployment crisis. Food Consumer Price Index (CPI) hit a 15-year high of 22.9% by the end of Q1 while unemployment levels reached 33.3% by the end of Q4. Banks, Food Products and Construction Materials, which collectively make up nearly 80% of holdings in NGE, all saw negative returns.

Conclusion

The long-awaited rollout of multiple vaccines in Q4 2020 set the stage for change in Q1 2021. How that change played out largely differed from country to country. External factors like a continued recovery in commodities, a new US administration with plans for accelerated vaccinations and infrastructure spending, as well as a more balanced recovery and rise in consumption in China all buoyed the global economy. Internal factors varied drastically, from India where record-high COVID cases threaten prospects of a V-shaped recovery, to South Korea where rising investments and exports are boosting confidence in the nation's recovery. Meanwhile, the dollar appreciated against most emerging market currencies during Q1, in a trend that has defied the expectations of many and presented challenges to the rebound of emerging markets. The lesson of Q1 is that vaccinations cannot drive a global recovery without cooperative efforts and wise policy decisions.

SEI Investments Distribution Co. (1 Freedom Valley Drive, Oaks, PA, 19456) is the distributor for the Global X Funds.

Investing involves risk, including the possible loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Securities focusing on a single country and narrowly focused investments may be subject to higher volatility. The Global X International Access Suite Funds are non-diversified.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Beginning October 15, 2020, market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates current NAV per share. Prior to October 15, 2020, market price returns were based on the midpoint between the Bid and Ask price. NAVs are calculated using prices as of 4:00 PM Eastern Time. The returns shown do not represent the returns you would receive if you traded shares at other times. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.

Carefully consider the funds' investment objectives, risks, and charges and expenses. This and other information can be found in the funds' full or summary prospectuses, which may be obtained at globalxetfs.com. Please read the prospectus carefully before investing.
