**GLOBAL X Lithium & Battery Tech ETF**

**KEY FEATURES**

**Efficient Access**
LIT offers efficient access to a broad basket of companies involved in lithium mining, lithium refining, and battery production.

**Thematic Exposure**
The fund is a thematic play on lithium and battery technology.

*PROD"
DEFINITIONS

Solactive Global Lithium Index
The Solactive Global Lithium Index tracks the performance of the largest and most liquid listed companies active in exploration and/or mining of Lithium or the production of Lithium batteries.

MSCI ACWI Index
MSCI ACWI Index captures large and mid cap representation across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries. The index covers approximately 85% of the global investable equity opportunity set. DM countries include: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the UK and the US. EM countries include: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Pakistan, Peru, Philippines, Poland, Russia, Qatar, South Africa, Taiwan, Thailand, Turkey and United Arab Emirates.

Annualized Volatility
The annualized standard deviation of the daily returns of the security using the closing levels of the index during the 22 index-day period preceding that day.

Beta
Measures the volatility of the Fund price relative to the volatility in the market index and can also be defined as the percent change in the price of the Fund given a 1% change in the market index. A beta below one suggests that the Fund was less volatile than the market benchmark.

Sharpe Ratio
Measures the return for each unit of risk. The risk free rate is subtracted from the mean return and is divided by the standard deviation of returns.

Lithium
Lithium is a chemical element which has several industrial applications including serving as the primary component to manufacture batteries. While there are no financial instruments tracking the direct price of lithium, the Fund gains exposure to the asset class through companies active in the exploration, mining and refinement of lithium.

Investing involves risk, including the possible loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Narrowly focused investments may be subject to higher volatility. There are additional risks associated with investing in lithium and the lithium mining industry. LIT is non-diversified. The information provided is not intended for trading purposes, and should not be considered investment advice.

Carefully consider the Fund’s investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in the Fund’s full or summary prospectus, which may be obtained by calling 1.888.493.8631, or by visiting globalxetfs.com. Please read the prospectus carefully before investing.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Beginning October 15, 2020, market price returns are based on the official closing price of an ETF share or, if the official closing price isn’t available, the midpoint between the national best bid and national best offer (“NBBO”) as of the time the ETF calculates current NAV per share. Prior to October 15, 2020, market price returns were based on the midpoint between the Bid and Ask price. NAVs are calculated using prices as of 4:00 PM Eastern Time. The returns shown do not represent the returns you would receive if you traded shares at other times. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
