### Summary

#### News:

1) Chevron Corp (CVX) announced it will acquire Noble Energy Inc. (NBL) for \$5 billion in an all-stock deal expected to close later this year. With the assumption of debt, the enterprise value of NBL is estimated at \$13 billion.

2) CNX Resources Corporation (CNX) and CNX Midstream Partners LP (CNXM) announced a deal which CNX will buy each outstanding common unit of CNXM in exchange for CNX common stock at a 15% acquisition premium to the average exchange ratio over the prior 30 day trading period. The transaction is valued at approximately \$357 million. The deal, requiring CNX to issue about 37 million shares, is expected to close in Q4.

3) There were no distribution cuts across midstream MLPs this distribution season, as measured by the Solactive MLP Infrastructure Index. The recovery in the energy markets from their historic lows gave midstream companies confidence to maintain distribution levels.

**Performance:** Midstream MLPs, as measured by the Solactive MLP Infrastructure Index, decreased 3.6% last month. The index is down by 46.87% since last July. (Source: Bloomberg)

**Yield:** The current yield on MLPs stands at 14.97%. MLP yields remained higher than the broad market benchmarks for High Yield Bonds (6.04%), Fixed Rate Preferreds (4.67%), Emerging Market Bonds (4.26%), and Investment Grade Bonds (1.91%).<sup>i</sup> MLP yield spreads versus 10-year Treasuries currently stand at 14.67%, higher than the long-term average of 5.26%.<sup>ii</sup> (Sources: Bloomberg and Fed Reserve)

**Valuations:** The Enterprise Value to EBITDA ratio (EV-to-EBITDA), which seeks to provide more color on the valuations of MLPs, decreased by -0.16% last month. Since 2019, the EV-to-EBITDA ratio is down by approximately 12.87%. (Source: Bloomberg)

**Crude Production:** The Baker Hughes Rig Count reduced to 251 rigs, decreasing by 14 rigs from last month's count of 265 rigs. US production of crude oil stayed flat at 11.000 mb/d in the last week of July compared to June levels. (Source: Baker Hughes & EIA)

MLPX ETF and MLPA ETF do not have any holding in Chevron Corp (CVX), Noble Energy Inc (NBL), CNX Resources Corporation (CNX), and CNX Midstream Partners LP (CNXM) as of 07/31/2020.

## DEFINITIONS

**Solactive MLP Infrastructure Index:** The Solactive MLP Infrastructure Index is intended to give investors a means of tracking the performance of the energy infrastructure MLP asset class in the United States. The index is composed of Midstream MLPs engaged in the transportation, storage, and processing of natural resources.

**The Solactive MLP & Energy Infrastructure Index:** The Solactive MLP & Energy Infrastructure Index is intended to give investors a means of tracking the performance of MLPs and energy infrastructure corporations. Midstream energy infrastructure MLPs and corporations principally own and operate assets used in energy logistics, including, but not limited to, pipelines, storage facilities and other assets used in transporting, storing, gathering, and processing natural gas, natural gas liquids, crude oil or refined products. The index limits its exposure to partnerships in order to comply with applicable tax diversification rules. Securities must be publicly traded in the United States. The index is maintained by Solactive AG.

**S&P MLP Index:** S&P MLP Index provides investors with exposure to the leading partnerships that trade on the NYSE and NASDAQ. The index includes both master limited partnerships (MLPs) and publicly traded limited liability companies (LLCs), which have a similar legal structure to MLPs and share the same tax benefits

**Bloomberg Barclays US Corporate High Yield Total Return Index:** The Bloomberg Barclays US Corporate High Yield Bond Index measures the USD-denominated, high yield, fixed-rate corporate bond market. Securities are classified as high yield if the middle rating of Moody's, Fitch and S&P is Ba1/BB+/BB+ or below. Bonds from issuers with an emerging markets country of risk, based on Barclays EM country definition, are excluded.

**ICE BofA Merrill Lynch Fixed Rate Preferred Securities Index:** ICE BofA Merrill Lynch Fixed Rate Preferred Securities Index tracks the performance of fixed rate US dollar denominated preferred securities issued in the US domestic market.

**Bloomberg Barclays EM USD Aggregate Total Return Index:** The Bloomberg Barclays Emerging Markets Hard Currency Aggregate Index is a flagship hard currency Emerging Markets debt benchmark that includes USD-denominated debt from sovereign, quasi-sovereign, and corporate EM issuers.

**Bloomberg Barclays US Corporate Total Return Value Unhedged Index:** The Bloomberg Barclays US Corporate Total Return Value Unhedged Index measures the investment grade, fixed-rate, taxable corporate bond market. It includes USD denominated securities publicly issued by US and non-US industrial, utility and financial issuers.

**Crude Oil:** Measured based on the Generic 1st 'CL' Future, which is the nearest crude oil future to expiration.

**EBITDA:** Earnings before interest, tax, depreciation and amortization (EBITDA) is a measure of a company's operating performance. Essentially, it's a way to evaluate a company's performance without having to factor in financing decisions, accounting decisions or tax environments.

**Average Spread:** Average spread is the average of the excess of the MLPs yield over the 10 year treasuries yield.

**Enterprise Value (EV):** EV is a measure of a company's total value, often used as a more comprehensive alternative to equity market capitalization.

SEI Investments Distribution Co. (1 Freedom Valley Drive, Oaks, PA, 19456) is the distributor for the Global X Funds.

Investing involves risk, including possible loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Investments in securities of MLPs involve risk that differ from investments in common stock including risks related to limited control and limited rights to vote on matters affecting the MLP. MLP common units and other equity securities can be affected by macro-economic and other factors affecting the stock market in general, expectations of interest rates, investor sentiment towards MLPs or the energy sector, changes in a particular issuer's financial condition, or unfavorable or unanticipated poor performance of a particular issuer (in the case of MLPs, generally measured in terms of distributable cash flow). The Global X MLP Funds invest in the energy industry, which entails significant risk and volatility. The Funds invest in small and mid-capitalization companies, which pose greater risks than large companies. MLPA has a different and more complex tax structure than traditional ETFs and investors should consider carefully the significant tax implications of an investment in the Fund. The Funds are non-diversified. Current and future holdings are subject to risk.

MLPA is taxed as a regular corporation for federal income tax purposes, which differs from most investment companies. Due to its investment in MLPs, the fund will be obligated to pay applicable federal and state corporate income taxes on its taxable income as opposed to most other investment companies. The fund expects that a portion of the distributions it receives from MLPs may be treated as tax-deferred return of capital. The amount of taxes currently paid by the fund will vary depending on the amount of income and gains derived from MLP interests and such taxes will reduce an investor's return from an investment in the fund. The fund will accrue deferred income taxes for any future tax liability associated certain MLP interests. Upon the sale of an MLP security, the fund may be liable for previously deferred taxes which may increase expenses and lower the fund's NAV.

The potential tax benefits from investing in MLPs depend on them being treated as partnerships for federal income tax purposes. If the MLP is deemed to be a corporation then its income would be

subject to federal taxation at the entity level, reducing the amount of cash available for distribution to the fund which could result in a reduction of the fund's value.

Bonds and bond funds will decrease in value as interest rates rise. High yield bonds involve greater risks of default or downgrade and are more volatile than investment grade securities, due to the speculative nature of their investments. In addition to the normal risks associated with investing, real estate and REIT investments are subject to changes in economic conditions, credit risk and interest rate fluctuations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Preferred stock is subject to many of the risks associated with debt securities, including interest rate risk. In addition, preferred stock may not pay a dividend, an issuer may suspend payment of dividends on preferred stock at any time, and in certain situations an issuer may call or redeem its preferred stock or convert it to common stock.

U.S. Treasury securities are considered to be of high credit quality and are backed by the full faith and credit of the U.S. government. U.S. Treasury securities, if held to maturity, guarantee a return of principal while no other securities mentioned in this material offer such a guarantee.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Market price returns are based upon the midpoint of the bid/ask spread at the close of the exchange and does not represent the returns an investor would receive if shares were traded at other times. Brokerage commissions will reduce returns. Global X NAVs are calculated using prices as of 4:00 PM Eastern Time.

Solactive Indexes have been licensed by Solactive AG for use by Global X Management Company, LLC. Global X Funds are not sponsored, endorsed, issued, sold, or promoted by Solactive AG nor does this company make any representations regarding the advisability of investing in the Global X Funds.

Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.

*Carefully consider the Funds' investment objectives, risk factors, charges, and expenses before investing.
