*Per MSCI, Group entities are defined as, financial accounts of listed companies holding stakes of 20% or more in other listed companies are analyzed to determine whether these stakes are controlling in nature and, consequently, whether both companies should be considered as belonging to the same group entity. In certain cases, even in the absence of consolidated accounts, MSCI may consider two companies as belonging to the same group entity where there is reasonable evidence of control based on other information.

Investing involves risk, including the possible loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume.

Investment in African securities involves heightened risks, including expropriation and/or nationalization of assets, confiscatory taxation, political instability including authoritarian and/or military involvement in governmental decision-making, armed conflict, the impact on the economy as a result of civil war, and social instability as a result of religious, ethnic and/or socioeconomic unrest and, in certain countries, genocidal warfare. The economic development of Nigeria has been significantly hindered by military rule, mismanagement, corruption and ethnic conflict. The Nigerian economy is heavily dependent on oil, which may subject the Fund to greater volatility. NGE is non-diversified.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
