INDXX U.S. INFRASTRUCTURE DEVELOPMENT INDEX

SELECTION

- The Index is designed to track the performance of companies that have or are expected to have significant exposure to infrastructure development in the United States (U.S.).
- Companies are only eligible for inclusion if they generate at least 50% of their revenues from the U.S.
- Companies must derive a significant portion of their revenues from the below industries or have stated their primary business to be in products and services focused on the below:
 - Construction & Engineering Services: provide engineering, design, maintenance, and construction services for large-scale infrastructure projects such as energy generation/distribution, water/wastewater, telecommunications, transportation (roads, bridges, tunnels, rail), airports and seaports.
 - Raw Materials and Composites: produce and supply raw and composite materials (steel, copper, nickel, tin, aluminum, concrete, asphalt, cement, and specialty chemicals) that are utilized in the construction and development of infrastructure projects.
 - Products and Equipment: sell or rent heavy construction equipment, cranes, electric and fiber optic cables, pipes, pumps, smart meters and other products or equipment utilized in large-scale infrastructure projects.
 - Industrial Transportation: transport infrastructure raw materials and equipment.
- The top 100 infrastructure development companies by market capitalization will form the final index. If fewer than 100 companies qualify inclusion in the index, all of the qualifying companies will comprise the index.

SELECTION POOL

- Eligible companies must have:
 - Minimum Total Market Capitalization of \$300 million.
 - Average Daily Turnover of at least \$1 million over the last 6 months.
 - Primary listing in the United States.
 - Traded on 90% of the eligible trading days in the last 6 months.
 - Free Float percentage of total shares outstanding of at least 10%.
- Existing constituents are excluded if they are not longer part of the Top 120 infrastructure development companies according to their market capitalization.

WEIGHTING SCHEME

- Index components are weighted according to modified market cap-weighting approach:
 - Each component is subject to maximum weight of 3% and minimum weight of 0.3%.
 - Security-level market capitalization is considered for calculating weights

REBALANCES/REVIEWS

- The index follows an annual reconstitution and rebalancing schedule. Rebalances are made at the close of business on the last trading day of January each year

Carefully consider the fund's investment objectives, risks, and charges and expenses before investing. This and other information can be found in the fund's full or summary prospectus, which may be obtained by visiting globalxetfs.com. Please read the prospectus carefully before investing.

Investing involves risk, including the possible loss of principal. Narrowly focused investments typically exhibit higher volatility. Investments in infrastructure-related companies have greater exposure to the potential adverse economic, regulatory, political and other changes affecting such entities. Investment in infrastructure-related companies are subject to various risks including governmental regulations, high interest costs associated with capital construction programs, costs associated with compliance and changes in environmental regulation, economic slowdown and excess capacity, competition from other providers of services and other factors.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
