REASONS TO CONSIDER

High Growth Potential
Forecasts suggest the global market for solar energy could reach $200bn by 2026, quadruple the market size in 2019.\(^1\)

Advancing Clean Technologies
Solar is the most abundant energy resource on earth.\(^2\) Increased adoption of solar technologies could potentially help address global power insecurity and minimize the adverse environmental impacts of fossil fuel consumption.

Conscious Approach
RAYS incorporates Environmental, Social & Governance (ESG) screens and follows ESG proxy voting guidelines to affect positive change alongside financial returns.

KEY INFORMATION

Inception Date 9/08/2021
Underlying Index Solactive Solar Index
Number of Holdings 50
Assets Under Management $5.98 mil
Total Expense Ratio 0.51%
Distribution Frequency Semi-Annually

The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor’s shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. High short-term performance, when observed, is unusual and investors should not expect such performance to be repeated. Returns for periods greater than one year are annualized. Click here for standard performance as of the most recent quarter-end.

DEFINITIONS

Solactive Solar Index

The Underlying Index is designed to provide exposure to companies that are positioned to benefit from further advances in the field of solar technology. Specifically, the Underlying Index consists of securities issued by “Solar Companies” as defined by Solactive AG, the provider of the Underlying Index (the “Index Provider”).

Investing involves risk, including the possible loss of principal. The investable universe of companies in which RAYS may invest may be limited. Narrowly focused investments will be more susceptible to factors affecting that sector and subject to more volatility. Solar companies typically face intense competition, short product lifecycles and potentially rapid product obsolescence. These companies may be significantly affected by fluctuations in energy prices (both solar and conventional energy) and in the supply and demand of renewable energy, tax incentives, subsidies and other governmental regulations and policies. Solar companies may be adversely affected by commodity price volatility, changes in exchange rates, imposition of import controls, availability of certain inputs and materials required for production, depletion of resources, technological developments and labor relations. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from social, economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. RAYS is nondiversified. The information provided is not intended for trading purposes, and should not be considered investment advice.

Carefully consider the Fund’s investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in the Fund’s full or summary prospectus, which may be obtained by calling 1.888.493.8631, or by visiting globalxetfs.com. Please read the prospectus carefully before investing.
