The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor’s shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. High short-term performance of the Fund, when observed, is unusual and investors should not expect such performance to be repeated. Returns for periods greater than one year are annualized.

ETF Category: Thematic Growth - Physical Environment
As of 3/31/2021
DEFINITIONS

**Indxx Renewable Energy Producers Index**  
The Indxx Renewable Energy Producers Index is designed to track the performance of companies that produce energy from renewable sources such as wind, solar, hydroelectric, geothermal, and biofuels.

**MSCI ACWI Index**  
MSCI ACWI Index captures large and mid cap representation across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries. The index covers approximately 85% of the global investable equity opportunity set. DM countries include: Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Hong Kong, Ireland, Israel, Italy, Japan, Netherlands, New Zealand, Norway, Portugal, Singapore, Spain, Sweden, Switzerland, the UK and the US. EM countries include: Brazil, Chile, China, Colombia, Czech Republic, Egypt, Greece, Hungary, India, Indonesia, Korea, Malaysia, Mexico, Pakistan, Peru, Philippines, Poland, Russia, Qatar, South Africa, Taiwan, Thailand, Turkey and United Arab Emirates.

**Annualized Volatility**  
The annualized standard deviation of the daily returns of the security using the closing levels of the index during the 22 index-day period preceding that day.

**Beta**  
Measures the volatility of the Fund price relative to the volatility in the market index and can also be defined as the percent change in the price of the Fund given a 1% change in the market index. A beta below one suggests that the Fund was less volatile than the market benchmark.

**Sharpe Ratio**  
Measures the return for each unit of risk. The risk free rate is subtracted from the mean return and is divided by the standard deviation of returns.

(1) The Fund's name, investment objective, and investment strategy changed effective November 19, 2018. The Fund inception date reflects the original inception date of the Fund when it was the Global X YieldCo ETF.

(2) RNRG traded under YLCO from inception until February 1, 2021.

(3) The Hybrid Index reflects the performance of the Indxx Global YieldCo Index through November 16, 2018 and the Indxx YieldCo & Renewable Energy Income Index thereafter. Subsequently, the fund and index name changed to the Global X Renewable Energy Producers ETF (RNRG) and the Indxx Renewable Energy Producers Index, respectively, effective February 1, 2021.

Investing involves risk, including the possible loss of principal. Investments in smaller companies typically exhibit higher volatility. The value of securities issued by companies in the energy sector may decline for many reasons, including, without limitation, changes in energy prices; international politics; energy conservation; the success of exploration projects; natural disasters or other catastrophes; changes in exchange rates, interest rates, or economic conditions; changes in demand for energy products and services; and tax and other government regulatory policies. RNRG is non-diversified. The information provided is not intended for trading purposes, and should not be considered investment advice.

Carefully consider the Fund’s investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in the Fund’s full or summary prospectus, which may be obtained by calling 1.888.493.8631, or by visiting globalxetfs.com. Please read the prospectus carefully before investing.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Shares of ETFs are not individually redeemable from the Fund. Beginning October 15, 2020, market price returns are based on the official closing price of an ETF share or, if the official closing price isn’t available, the midpoint between the national best bid and national best offer (“NBBO”) as of the time the ETF calculates current NAV per share. Prior to October 15, 2020, market price returns were based on the midpoint between the Bid and Ask price. NAVs are calculated using prices as of 4:00 PM Eastern Time. The returns shown do not represent the returns you would receive if you traded shares at other times. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
