MSCI Emerging Markets Top 50 Dividend Index

Selection Pool

- Selection universe is based on the MSCI Emerging Markets Index (Parent Index), which includes large and mid-cap stocks across 26 emerging market countries.
- Eligible companies must have:
  - A minimum dividend yield of 5% and a maximum yield of 20%;
  - 1-year dividend per share (DPS) growth greater than, or equal to, zero; and
  - A price return over the prior 12 months that is not in the bottom 5th percentile relative to the constituents of the Parent index as of the previous month.

Weighting at Selection/Rebalancing

- Existing constituents are retained if they have:
  - A dividend yield of at least 3%;
  - 1-year DPS growth greater than, or equal to, zero; and
  - Same or higher payout ratio change compared to the prior year if the 1-year DPS growth is between -10% and 0%.
- Securities are weighted equally.
- Country and sector exposure are each capped at 35% to achieve greater diversification.
- If there are multiple securities from the same issuer, only the security with the highest dividend yield amongst them is retained.
- Additional securities are selected from the Parent index in order of decreasing dividend yield until 50 securities is reached.

Rebalancing

- Index components are rebalanced on a quarterly basis on the last calendar day in February, May, August and November.
For more information on the Index, please visit MSCI's website.

*For the complete and current index methodology please refer to the index provider’s website. This summary document is accurate as of the time of its publication and Global X does not guarantee that it is current at any point thereafter.

The selection of the index constituents and their weighting is made by the index provider at its sole discretion.

Carefully consider the fund’s investment objectives, risks, and charges and expenses. This and other information can be found in the fund’s full or summary prospectus, which may be obtained by visiting globalxetfs.com. Please read the prospectus carefully before investing.

Investing involves risk, including the possible loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. High yielding stocks are often speculative, high-risk investments. These companies can be paying out more than they can support and may reduce their dividends or stop paying dividends at any time, which could have a material adverse effect on the stock price of these companies and the Fund’s performance. SDEM is non-diversified.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
