

# Global X Uranium ETF

As of 3/31/2024

#### **REASONS TO CONSIDER**

#### High Growth Potential

Uranium will likely play a key role in the global energy transition. Forecasts suggest that reactor demand could rise from an estimated 65,650 metric tonnes in 2023 to nearly 130,000 in 2040.<sup>(1)</sup>

# **Emerging Energy Opportunity**

Nuclear energy is a dependable method for generating clean electricity, emitting zero direct emissions during operations. (2) As governments pledge to reduce fossil fuel reliance, nuclear could be a viable bridge while more renewable capacity is built.

# **ETF Efficiency**

In a single trade, URA delivers efficient access to a basket of companies involved in mining uranium and producing nuclear components.

The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. High shortterm performance, when observed, is unusual and investors should not expect such performance to be repeated. Returns for periods greater than one year are annualized. For performance data current to the most recent month end, please call 1-888-493-8631, or visit www.globalxetfs.com.

# COUNTRY BREAKDOWN (%)

(3) The Fund's investment objective and investment strategies changed effective May 01, 2018 and again on August 01, 2018.

(4) The Hybrid Solactive Uranium Index reflects the performance of the Solactive Global Uranium Total Return Index through April 30, 2018, the Solactive Global Uranium & Nuclear Components Transition TR Index through July 31, 2018 and the Solactive Global Uranium & Nuclear Components Total Return Index going forward.

Investing involves risk, including the possible loss of principal. International investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Narrowly focused investments may be subject to higher volatility. There are additional risks associated with investing in Uranium and the Uranium mining industry. URA is non-diversified. The information provided is not intended for trading purposes, and should not be considered investment advice.

Carefully consider the Fund's investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in the Fund's full or summary prospectus, which may be obtained by calling 1.888.493.8631, or by visiting globalxetfs.com. Please read the prospectus carefully before investing.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Beginning October 15, 2020, market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates current NAV per share. Prior to October 15, 2020, market price returns were based on the midpoint between the Bid and Ask price. NAVs are calculated using prices as of 4:00 PM Eastern Time. The returns shown do not represent the returns you would receive if you traded shares at other times. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.
