

REASONS TO CONSIDER

Long-Term Growth Potential

Vietnam's GDP grew at a rate exceeding 7% in both 2018 and 2019. Though interrupted by the pandemic, it is expected to resume annual rates of more than 6% growth in 2022-2025.⁽¹⁾

Targeted Exposure

The Fund targets exposure to a single country.

Efficient Access

Efficient access to a broad basket of Vietnamese securities.

The performance data quoted represents past performance and does not guarantee future results. Investment return and principal value of an investment will fluctuate so that an investor's shares, when sold or redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance quoted. High short-term performance of the Fund, when observed, is unusual and investors should not expect such performance to be repeated. Returns for periods greater than one year are annualized. [Click here](#) for standard performance as of the most recent quarter-end.

DEFINITIONS

MSCI Vietnam IMI Select 25/50 Index

The Underlying Index is designed to represent the performance of the broad Vietnam equity universe, while including a minimum number of constituents, as defined by MSCI, Inc. ("MSCI"), the provider of the Underlying Index ("Index Provider"). The broad Vietnam equity universe includes securities that are classified in Vietnam according to the MSCI Global Investable Market Index Methodology, together with companies that are headquartered or listed in Vietnam and carry out the majority of their operations in Vietnam, as determined solely by the Index Provider. The country classification of a company is generally determined by the Index Provider using the company's country of incorporation and the primary listing of its securities. The Index Provider will classify a company in the country of incorporation if its securities have a primary listing in that country. In such cases where a company's securities have a primary listing outside of the country of incorporation, additional criteria such as the location of the company's headquarters and the geographic distribution of its operations (e.g. assets and revenues), management, and shareholder base are considered by the Index Provider for classification purposes. The Underlying Index follows a rules-based methodology that is designed to select all securities that satisfy the above criteria and which have a market capitalization greater than or equal to the 99th percentile of listed developed market securities, have an annual traded value ratio (a measure of liquidity calculated by the Index Provider) greater than or equal to 15%, and have traded on greater than or equal to 50% of trading days over the past twelve months.

Investing involves risk, including the possible loss of principal. International investing may involve risk of capital loss from unfavorable fluctuations in currency values, from differences in generally accepted accounting principles, or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Securities focusing on a single country may be subject to higher volatility. VNAM is non-diversified. The information provided is not intended for trading purposes, and should not be considered investment advice.

Carefully consider the Fund's investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in the Fund's full or summary prospectus, which may be obtained by calling 1.888.493.8631, or by visiting globalxetfs.com. Please read the prospectus carefully before investing.

Shares of ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the Fund. Brokerage commissions will reduce returns. Market price returns are based on the official closing price of an ETF share or, if the official closing price isn't available, the midpoint between the national best bid and national best offer ("NBBO") as of the time the ETF calculates current NAV per share. NAVs are calculated using prices as of 4:00 PM Eastern Time. The returns shown do not represent the returns you would receive if you traded shares at other times. Indices are unmanaged and do not include the effect of fees, expenses or sales charges. One cannot invest directly in an index.

Since the Fund's shares did not trade in the secondary market until several days after the Fund's inception, for the period from inception to the first day of secondary market trading in Shares, the NAV of the Fund is used to calculate market returns.
