Founded in 2008, Global X is a sponsor of exchange-traded funds (ETFs). We are distinguished by our Thematic Growth, Income, and International Access ETFs.

**THEMATIC GROWTH**
Targeting companies that may be poised to benefit from structural shifts in disruptive technology, people and demographics, and infrastructure development, the Thematic Growth family offers a range of exposures to emerging economic trends.

**INCOME**
Offering solutions for investors seeking to increase or diversify the yield potential of their portfolio, the Income family offers a wide range of equity income strategies – including high dividend stocks, covered calls, preferreds, and MLPs – as well as fixed income and outcome-oriented TargetIncome ETFs.

**CORE**
Core ETFs serve as key portfolio building blocks that seek to deliver exposure to specific factors or values. This family includes our multi-factor ETFs and our Environmental, Social & Governance (ESG) ETFs.

Alpha: Defined as the excess return of a fund relative to a benchmark index.
Beta: Measures the volatility of the Fund price relative to the volatility in the market index and can also be defined as the percent change in the price of the Fund given a 1% change in the market index.

Investing involves risk, including the possible loss of principal. In addition to the normal risks associated with investing, international investments may involve risk of capital loss from unfavorable fluctuation in currency values, from differences in generally accepted accounting principles or from economic or political instability in other nations. Emerging markets involve heightened risks related to the same factors as well as increased volatility and lower trading volume. Narrowly focused investments and investments focusing on a single country may be subject to higher volatility. There are additional risks associated with investing in base and precious metals as well as their respective mining industries. Investments in smaller companies typically exhibit higher volatility. High yield bonds involve greater risks of default or downgrade and are more volatile than investment grade securities, due to the speculative nature of their investments.

Carefully consider the funds’ investment objectives, risk factors, charges, and expenses before investing. This and additional information can be found in the funds’ summary or full prospectus, which may be obtained by visiting globalxetfs.com. Please read the prospectus carefully before investing.
